

## **Patriot COVID Policy**

The health and safety of our players is a priority and we rely on the data and science in making decisions regarding Covid. With that in mind, our policy is as follows:

If positive for COVID, then must quarantine per CDC guidance.

If direct exposure, then quarantine unless either 1) vaccinated or 2) have had COVID within last 6 months OR if longer than 6 months can show that still have Covid antibodies.

- Six months because this was the length of time considered in the Israeli study, which looked at unvaccinated populations who had Covid within a 6 month period.
- Direct exposure (i.e., "close contact") is defined as being w/n 6 feet of someone for 15 minutes or more.
